

Cosmetic services

Cosmetics Regulation in Europe becomes more complex in this decennium. Adaptations in the field of perfume ingredients, colourants and c-GMP are continuously developing. Another very important development is REACH. Not only chemical companies, but also cosmetic, cosmetic ingredient and household companies are affected by REACH. REACH and other related legislation require a major effort from the industry to achieve compliance. Besides this, the new CLP regulation affects the cosmetic, household and cleaning industries. Royal Haskoning matches this diversity with tailor-made services and consultancy. We focus on the technical (e.g. chemistry, safety evaluation) matters, we give strategic advice and we can assist you with providing complete solutions.

Chemicals Management is an advisory group within Royal Haskoning. This group consists of 25 experts, including toxicologists, chemists, industrial hygienists as well as Regulatory Affairs- and Information specialists. We are trained chemicals management consultants (e.g. industrial chemicals, cosmetics, biocides, pesticides, etc.) that assist companies in the implementation and management of Cosmetic services. Our extensive experience within various industry branches and with authorities enable us to support you on every management level in organizing Cosmetic services in relation to other chemicals management activities within your company.

ROYAL HASKONING

thinking in
all dimensions

Our (core) services on Cosmetics (and Household, Consumer Care Products) include, but are not limited to:
